DESCRIPTION
K-FLEX® INSUL-LOCK® DS (DoubleSeal) is an NBR/PVC-based closed cell, flexible elastomeric foam insulation. It is pre-slit with a factory-applied pressure sensitive modified-acrylic adhesive with scrim reinforcement on the seam surface and a flexible PVC overlap tape with acrylic adhesive for doubled seam security. It is environmentally-friendly as it is free of CFCs, HFCs, HCFCs, PBDEs, formaldehyde and fibers. An EPA-registered antimicrobial agent is incorporated into the product providing additional protection against mold, fungal and bacterial growth. It is UL GREENGUARD® Gold Certified for low VOC emissions. The product's key physical properties are approved by Factory Mutual. The product is made in K-FLEX USA's ISO 9001:2008-certified manufacturing facility in North Carolina.

AVAILABILITY
K-FLEX® INSUL-LOCK® DS is black in color and is available in 6" length tube form in wall thicknesses of 1/2" up to 2" in diameter sizes ranging from 3/8" I.D. to 4" IPS. (ID range is subject to variation depending on wall thickness).

*3/8" thick product is available and consists of only hot melt adhesive on both seams for sealing purposes.

APPLICATIONS
K-FLEX® INSUL-LOCK® DS is recommended for applications with service temperatures ranging from -40°F (-40°C) to +220°F (+104°C). The product is used to retard heat gain and prevent condensation or frost formation on below-ground applications, including refrigerant, condensation or frost formation on below-ground applications, including refrigerant, cold water plumbing, chilled water, and ambient applications, meeting the requirements of NFPA 90A/B.

OUTDOOR APPLICATIONS
K-FLEX® INSUL-LOCK® DS is made from a UV-resistant elastomeric blend. For low-to-moderate UV exposure (residential applications), no additional protection is needed. For severe UV exposure (roof top applications) or for optimum performance, K-FLEX® 374 Protective Coating, approved jacketing or K-FLEX Clad® is recommended.

UNDERGROUND APPLICATIONS
K-FLEX® INSUL-LOCK® DS is acceptable for use in buried applications with maximum service temperatures of 160°F (71°C) using the same installation principles as above ground applications. For lines above the water table, use a clean fill such as sand (3"-5" layer) to protect the insulation before backfilling. For optimum performance, the lines should be encased in a conduit to protect them from problems associated with ground water intrusion and compaction. If a conduit is not used, the insulation thickness should be increased by one thickness size to compensate for compaction.

INSTALLATION
K-FLEX® INSUL-LOCK® DS is flexible (even at low temperatures), durable (non-fracturing and skin is resistant to tearing from handling and environment), safe to handle (non-dusting and non-abrasive), and lightweight for an efficient installation. K-FLEX® INSUL-LOCK® DS is designed to save on labor costs, particularly on straight runs, and reduce the use of contact adhesives, allowing for improved working conditions and compliance with OSHA requirements.

K-FLEX recommends that insulation is installed on non-operational systems with clean, dry surfaces in ambient conditions between 40°F and 100°F. For cold weather installations, it is critical that sufficient pressure levels be applied for proper seam sealing. For properly sized insulation tubing, slip the tube on the pipe, pull the built-in release liner, pinch the tube shut, apply pressure at the seams, and apply the overlap seam using pressure. All butt joints, termination points and open ends should be sealed with an approved contact adhesive, making sure both surfaces to be joined are coated. Longitudinal seams should face downward and vapor stops should be installed as needed. Fittings (elbows, tees, p-traps) and special parts (flanges, valves, etc.) can be field-fabricated from insulation tubes and sheets or K-Fit® factory-fabricated fittings can be used. ASTM C1710, Installation Guide for Flexible Closed Cell Foams, and the K-FLEX Installation Manual should be used as comprehensive installation guides.

RESISTANCE TO MOISTURE
K-FLEX® INSUL-LOCK® DS is flexible (even at low temperatures), durable (non-fracturing and skin is resistant to tearing from handling and environment), safe to handle (non-dusting and non-abrasive), and lightweight for an efficient installation. K-FLEX® INSUL-LOCK® DS is designed to save on labor costs, particularly on straight runs, and reduce the use of contact adhesives, allowing for improved working conditions and compliance with OSHA requirements.

INSTALLATION
K-FLEX® INSUL-LOCK® DS is flexible (even at low temperatures), durable (non-fracturing and skin is resistant to tearing from handling and environment), safe to handle (non-dusting and non-abrasive), and lightweight for an efficient installation. K-FLEX® INSUL-LOCK® DS is designed to save on labor costs, particularly on straight runs, and reduce the use of contact adhesives, allowing for improved working conditions and compliance with OSHA requirements.

K-FLEX® INSUL-LOCK® DS in wall thicknesses of 2" (50 mm) and below has a flame spread rating of 25 or less and a smoke development rating of 50 or less as tested to ASTM E84, “Surface Burning Characteristics of Building Materials”. It is acceptable for duct/plenum applications, meeting the requirements of NFPA 90A/B.

Numerical flammability ratings alone may not define the performance of products under actual fire conditions. They are provided only for use in the selection of products to meet limits specified when compared to a known standard.

SPECIFICATION COMPLIANCE
- ASTM C534 Type 1, Grade 1
- ASTM D1056-00-2B1
- New York City MEA 186-86-M Vol. V
- USDA Compliant
- CFRA Compliant
- RoHS Compliant
- UL 94-5V Flammability Classification (#E300774)
- ASTM E84 25/50-rated (to 2") - tested to UL 723. NFPA 255 and CAN/ULC S102-03
- FMRC Approval Guide: Chapter 14 Pipe Insulation
- NFPA No. 101 Class A Rating
- NFPA 90A, 90B
- Meets requirements of California EGB Title 24
- UL GREENGUARD® Gold Certified
- Meets energy code requirements of ASHRAE 90.1 and 189.1
### PHYSICAL PROPERTIES

**Main Composition**
- Flame-retarded NBR/PVC-based elastomeric foam

**K-FLEX ® INSUL-LOCK® DS**
- Thermal Conductivity (K)
  - 90°F (32°C) Mean Temp: 0.258 (0.0372) Btu-in/hr-Ft²-°F (W/mK)
  - 75°F (24°C) Mean Temp: 0.245 (0.0353) Btu-in/hr-Ft²-°F (W/mK)
  - 32°F (0°C) Mean Temp: 0.235 (0.0339) Btu-in/hr-Ft²-°F (W/mK)

**TEST METHODS**
- ASTM C177
- ASTM E84
- ASTM D1667
- ASTM C635
- ASTM C534
- ASTM C665
- ASTM D635
- ASTM C411
- ASTM D1171
- ASTM C1304
- ASTM D1056
- UL 181, ASTM G21
- DIN 988
- DIN 1988
- QUV Chamber Test
- ASTM C209
- ASTM E90
- ASTM E96
- ASTM E1171

- **Density**: 3-6 lb/ft³
- **Operating Temperature Range**: -40°F (-40°C) to +220°F (104°C)
- **Water Vapor Permeability (Dry Cup: Elastomeric Insulation)**: <0.01 perm-in
- **Water Vapor Permeability (Wet Cup: Glued Seam with Overlap)**: 0.10 perm-in
- **Seam Tape**: High-tack, modified-acrylic pressure sensitive adhesive (foam-tearing bond) with polymeric scrim reinforcement that provides excellent adhesive/composite reinforcement, dimensional stability and conformability while maintaining maximum adhesion properties.
- **Overlap Tape**: Factory-applied tape comprised of flexible PVC strip, aggressive acrylic pressure sensitive adhesive (foam-tearing bond) and a polyethylene teraphthalate (PET) release liner.
- **Overlap Tape**: Factory-applied tape comprised of flexible PVC strip, aggressive acrylic pressure sensitive adhesive (foam-tearing bond) and a polyethylene teraphthalate (PET) release liner.

**Physical Properties**
- **Flame Spread / Smoke Development (up to 2” wall)**: <25/50
- **Water Absorption (Volume Change)**: 0%
- **Flammability**: Self-Extinguishing
- **Dimensional Stability**: <7% Linear Shrinkage
- **Hot Surface Performance (220°F)**: No Cracking or Delamination
- **Ozone Resistance**: Pass
- **Odor Emissions**: No Objectionable Odor
- **Chemical/Solvent/Oil/Grease Resistance**: Good
- **Flexibility**: Excellent
- **Mildew Growth Resistance/Air Erosion**: Pass
- **Corrosion Risk**: pH neutral: 6.6±0.04
- **Leachable Chlorides**: <0.05% water-soluble chloride ions
- **UV / Weather Resistance**: Pass
- **Sound Transmission Class (1”)**: 13

**Thickness Recommendations (to Prevent Condensation)**
